

Biochem., Mol. Biol. & Biophysics, 140 Gortner Lab, 1479 Gortner Ave., St. Paul, MN 55108. Instrument: Anaerobic glovebox for crystallography. Manufacturer: Belle Technology UK Ltd, Great Britain. Intended Use: The instrument will be used to study the growth of crystals of oxygen-sensitive proteins and trapping of catalytic intermediates in crystals of enzymes which utilize oxygen as a substrate. The objective is to produce atomic resolution molecular structures of oxygen-sensitive or oxygen-dependent proteins by x-ray crystallography. The necessary features of this instrument include an entry port in the floor of the microscope box that forms an air-tight seal with a two liter liquid nitrogen dewar mated to the port from outside the box. Air needs to be expelled (purged) from above the liquid nitrogen surface and replaced with gaseous nitrogen. Closure of the port allows removal of the dewar. An air-tight door between the larger anaerobic crystallization box and the anaerobic microscope box is also necessary. Justification for Duty-Free Entry: There are no instruments of the same general category manufactured in the United States. Application accepted by Commissioner of Customs: January 23, 2014.

Dated: February 24, 2014.

Director of Subsidies Enforcement,
Enforcement and Compliance.
